

Beef Supreme Exhibitor Study Guide

1. Know the importance of selecting a quality animal. 2-1
2. Know how much the ideal market steer weighs. 2-11
3. Know the terms relating to beef conformation. 2-12
4. Know what you should consider when selecting a beef project animal. 2-14:2-15
5. Know what the frame score is. 2-16:2-17
6. Know the importance of disposition when selecting project animals. 2-23
7. Know what to do if your calf is eating its bedding. 3-1
8. Know how to prevent calves from escaping. 3-1:3-2
9. Know the main methods for identifying cattle. 3-7
10. Know the basics of halter breaking a calf. 3-8: 3-9
11. Know how to safely approach cattle. 4-2
12. Know the consequences of mishandling a calf. 4-4
13. Know how to prevent a livestock related accident. 4-5
14. Know how long to quarantine new cattle. 5-1
15. Know how an animal's enclosure/environment can affect its health. 5-1
16. Know the common cattle parasites and general methods of treating parasites. 5-2:5-4
17. Know how to safely give a vaccine to cattle. 5-7
18. Know the average gestation of cattle. 6-1
19. Know about beef stomachs and what type of animal that makes them. 7-1:7-2
20. Know the essential nutrients for cattle. 7-2
21. Know the importance of reading feed tags. 7-14
22. Know what concentrates are. 7-22
23. Know what to ask your producer about feed. 7-22
24. Know what to do if your calf doesn't finish its feed. 7-23
25. Know what yield grading and quality grading are. 8-1
26. Know what intramuscular fat/marbling is. 8-2
27. Know what dressing percentage is. 8-5
28. Know the uses for cattle by-products. 8-14:8-15
29. Know how to groom your calf in preparation for the show. 9-13
30. Know how to safely show beef. 9-13
31. Know how to use a show stick. 9-13
32. Know what withdrawal time is. 12-3
33. Know the importance of manure management. 13-4

Dog Supreme Exhibitor Study Guide

1. Know what type of diet dogs eat. Pg. 12
2. Know roughly how long dogs have been domesticated. Pg. 12
3. Know dog jaw, eye, ear, tail, topline, foot and leg types. Pg. 23-28
4. Know the different types of dog brushes and their uses. Pg. 30
5. Know how often to brush your dog's teeth. Pg. 35
6. Know how being purebred or cross bred can influence a dog's health. Pg. 38
7. Know how dogs communicate using body language. Pg. 45-48
8. Know how to start kennel training. Pg. 55
9. Know the drawback of playing tug of war with your dog. Pg. 58
10. Know what positive reinforcement is. Pg. 61-62
11. Know what your role is in your dog's life. Pg. 63
12. Know what recall enrichment games are. Pg. 67
13. Know the benefits/drawbacks of a slip collar. Pg. 71
14. Know how to train your dog to sit. Pg. 73
15. Know what topography is. Pg. 130
16. Know the purpose of a dewclaw. Pg. 132
17. Know how shedding changes seasonally. Pg. 133
18. Know what skeletal muscles are. Pg. 134
19. Know what sense develops first in dogs. Pg. 137
20. Know the signs of an unhealthy dog. Pg. 141
21. Know the benefits of vaccines. Pg. 141
22. Know the essential nutrients for dogs. Pg. 160
23. Know the benefits of different types of dog food. Pg. 161

Goat Supreme Exhibitor Study Guide

1. Know the importance of starting with a quality animal. p 11
2. Know the basics of successful goat producing. P 11
3. Know how long goats have been domesticated. p 11
4. Know the characteristics of boer goats. P 17-18
5. Know the goat traits evaluated in the show ring. p 21
6. Know how to prevent a livestock related accident. p34
7. Know the importance of proper animal handling p 33
8. Know the average length of gestation in goats. P 37
9. Know the properties of colostrum. p 38 & p 62
10. Know how a goat's stomach works, and what type of animal that makes them. p 49
11. Know the main component of forage. p 50
12. Know the result of a Low fiber/high concentrate diet. P 50
13. Know the essential nutrients for goats. P 51
14. Know what forages are. p 57
15. Know the importance of being able to read a feed tag. p 58
16. Know what a guarantees analysis is and what it can tell you. P. 59
17. Know how to manage goats in the pasture. P. 60
18. Know what safety considerations to make when constructing feed troughs. P 61
19. Know how a newborn kid's digestive system functions. p 61
20. Know when and how to dehorn kids. P 80
21. Know how to care for hooves. 85
22. Know how to prevent external parasites P. 88
23. Know what ringworm is. P 91
24. Know the benefits of goat's milk and what can be made from it. p 109 & P 114
25. Know how quality assurance and animal welfare are connected. p 115
26. Know what aspects to consider when selecting a meat goat. P 116-117
27. Know where the greatest demand for goat meat in the U.S. comes from. p 120-121
28. Know the wholesale cuts of goat meat. P 122-123
29. Know the two types of marketable fiber produced by goats. P 127
30. Know the types of utility goats. P 132-138
31. Know what goats need in their environment. p 148
32. Know the importance of proper manure management. P 152-153
33. Know how to calculate profit. p 156
34. Know what withdrawal time is. P 164
35. Know the different types of injections given to goats. P 165
36. Know what rule to follow when giving injections. P 165-166
37. Know how to show a goat. p 176

Horse Supreme Exhibitor Study Guide

1. Know which breeds are classified as stock horses. P. 3
2. Know how many inches are in a hand. P.8
3. Be able to describe bay coloring. P. 9
4. Know what markings a horse can be identified by. p. 10
5. Know what Milk teeth are. P 13
6. Know the two most important factors when purchasing a horse. P 15
7. Know how a horse's vision works p 17
8. Know what precautions you can take to avoid being kicked by a horse. p 18
9. Know the basics of handling a horse. P 17-28
10. Know how often you should groom your horse. P 29
11. Know the benefits of regular grooming. p. 29
12. Know how much a healthy hoof will grow in a month. P. 31
13. Know what considerations to make when housing your horse. P 33-35
14. Know what tooth floating is. P. 39
15. Know how a horse's stomach works. P 39
16. Know the essential nutrients for horses. p 40
17. Know how much roughage a horse will need to consume. P 42
18. Know what complete feed can and cannot provide nutritionally to your horse. p 44
19. Know what colic is. P 45 & p 77
20. Know how the size of the horse's stomach affects feeding. p 49
21. Know how many pounds of dry forage a 1000lb horse will consume each month. P 58
22. Know the average length of gestation in horses. P 60
23. Know the properties of colostrum. P 61
24. Know the terms for confirmation in horses. p 70
25. Know about proper manure management. P 73
26. Know the average temperature of a horse at rest. p 74
27. Know what measures should be taken if your horse contracts Vesicular stomatitis. p 85
28. Know how horses are usually infected with internal parasites. p 89
29. Know what dangers flies pose to your horse. p 94
30. Know which parasite is highly contagious to humans. P 95
31. Know the types of western bits. P 104
32. Know the types of natural riding aids. P 118-119
33. Know the four major consideration when evaluating a horse's conformation. P 140

Poultry Supreme Exhibitor Study Guide

1. Know the different chicken comb types. pg. 13
2. Know what frizzling is and what species can get it. Pg. 23
3. Know how and when to lower the temperature in a brooding box and the starting temperature. Pg. 25
4. Know the signs of an unhealthy chick. Pg. 26
5. Know what to add to a chick's water to increase their chances of survival. Pg. 27
6. Know the number one cause of chick death. Pg. 28
7. Know how to keep chicks healthy. Pg. 29
8. Know the benefits and drawbacks of chicken wire. Pg. 30
9. Know the maximum percentage of protein a laying hen can have in their feed. Pg. 31
10. Know what permethrin is and how to safely handle it. Pg. 33
11. Know what makes a chicken prone to frostbite. pg 34
12. Know the main predators that will threaten your coop. Pg. 36
13. Know how to separate poultry in preparation for a show. Pg. 39
14. Know when and how to bathe a show chicken. Pg. 43
15. Know where to band poultry for identification. Pg. 47
16. Know how often to clean your poultry pens/cages while at a show. Pg. 48
17. Know how long to quarantine poultry after a show and how to reintroduce quarantined birds. Pg. 50-51 & 74
18. Know what you call female and male ducks. Pg. 52
19. Know what poultry can and cannot be raised together. Pg. 57
20. Know the maximum percentage of protein a duckling can have in their feed. Pg. 58
21. Know what feather oil is and how it is used by young poultry. Pg. 58
22. Know what you call female and male turkeys. Pg. 66
23. Know what class a heritage turkey would be show in. Pg. 68
24. Know the percentage of protein a poult should have in their feed? Pg. 68
25. Know the risks of housing turkeys and chickens together. Pg. 72
26. Know which month is the best for special ordering birds for fair. Pg. 98

Rabbit Supreme Exhibitor Study Guide

1. Know whether or not rabbits are rodents. p. 9
2. Know what you should consider when selecting a rabbit. p. 11
3. Know the conformation body types in rabbits and which type is ideal for meat rabbits. p 28-29
4. Know the rabbit fur types. p. 30
5. Know how to determine the size of your rabbit cage. p 35-36
6. Know how to properly stack rabbit cages. p. 36.
7. Know the importance of researching equipment before buying. p 35-40
8. Know which ear to tattoo your rabbit in, and the basic steps to tattooing. p. 42
9. Know what type of diet rabbits eat. (p 47)
10. Know how a rabbit's stomach works. p 47
11. Know the essential nutrients for rabbits. p 48
12. Know the importance of fiber in your rabbit's diet. P 48
13. Know what cecotropes are. p 48
14. Know the importance of cost per pound in market rabbits. p 50.
15. Know how to properly store rabbit feed. p 51.
16. Know the basics of keeping your rabbit healthy. P 53-56
17. Know the correct way to handle and consequences of mishandling your rabbit. p 54- 55
18. Know how to examine your rabbits for disease. p 56
19. Know which common rabbit disease is highly contagious to humans. p 59-63
20. Know what to do if Viral Hemorrhagic Disease is detected in your rabbitry. (61)
21. Know the length of gestation in rabbits. P 66
22. Know what it is called when a rabbit gives birth. P. 68
23. Know in what condition kits are born. p 68-69
24. Know under what circumstances to learn about rabbit genetics. p 70-71
25. Know what dressing percentage is. p 73
26. Know the qualities of rabbit meat. p 82
27. Know what all goes into showing your rabbit. p 83
28. Know how and when to groom your rabbit for the show. p 83-84
29. Know the aspects of good rabbit showmanship. P 84-85
30. Know the commercial reasons to raise rabbits. P. 91-94
31. Know what withdrawal time is. p 98
32. Know how rabbits can communicate with humans. p. 103-105
33. Know what exercise and enrichment your pet rabbit needs. p. 109-113

Sheep Supreme Exhibitor Test

1. Know the importance of selecting a quality animal. p 9
2. Know the terms of conformation in sheep. P 10
3. Know how many pounds the average lamb on a good ration will gain per day. P 13
4. Know what aspects to consider when selecting a 4-H Project lamb. P 14 & p 18-19
5. Know what to use for bedding in your lamb's enclosure. P 21.
6. Know how to safely catch and move a sheep. 23.
7. Know what reasons you would have for setting a lamb up on its rump. P 26
8. Know why you should trim your lamb's hooves. p 27
9. Know how to identify a lamb. p. 31
10. Know the average healthy temperature of a sheep, and how to take it. P 33
11. Know what time of year is best to breed ewes. p 34.
12. Know the average gestation length for sheep. p 35
13. Know the properties of colostrum. p 36
14. Know the basics of giving an injection to a lamb. P 40
15. Know when lambs should be docked and castrated. P 41
16. Know when lambs should be weaned. 46
17. Know what type of animal sheep are based on their stomach. p 49
18. Know the names of the stomach compartments in sheep. p 49
19. Know the essential nutrients in sheep. P 50
20. Know the basic properties of roughage. P 50
21. Know what concentrates are. p 50
22. Know how nutrition will affect your end product. p 55 & p 67
23. Know how to feed your lamb right after taking it home from the producer. p 55
24. Know why it's important to pay attention to how much you lamb eats. p 57
25. Know what dry matter is and why it's important. p 58-59
26. Know the importance of reading a feed tag. p 64
27. Know why long stem roughage is important. P 65
28. Know how long to quarantine new sheep. P 67
29. Know the wholesale cuts of market lamb. P 81.
30. Know what can be made from sheep by-products. 84
31. Know the characteristics of wool. P 85
32. Know the basics of sheep shearing. p 86
33. Know the major classes of wool and what wool scouring is. P 85- 86
34. Know the importance of practicing showmanship and pre show grooming. p 91 & p 94-95
35. Know how to position a sheep while showing and the aspects of good showmanship. p 97
36. Know how to prevent animal related accidents. p 104-105
37. Know the breed characteristics of Hampshire, shropshire, and Suffolk. P 111-115
38. Know what withdrawal time is. P 143

Swine Supreme Exhibitor Study Guide

1. Know the importance of selecting a quality animal. 3-1
2. Know the breed characteristics of Chester White, Yorkshire, and Hampshire pigs. 3-3:3-5
3. Know how to select a pig that will reach your target weight by fair. 3-7
4. Know what characteristics to consider when selecting a market pig. 3-14
5. Know the ideal muscling that a market pig should have. 3-9
6. Know what factors determine market quality in pigs. 4-1
7. Know the cause and characteristics of Porcine Stress Syndrome (PSS) 4-1:4-2
8. Know what Dressing Percentage is. 4-5
9. Know about intramuscular fat/marbling. 4-16
10. Know the wholesale cuts of pork. 5-1
11. Know where pig by-products are commonly used. 5-4
12. Know what type of stomach pigs have. 7-1
13. Know the essential nutrients for pigs. 8-1:8-3
14. Know how much water a pig needs to drink. 8-1
15. Know the most important minerals a pig needs in its diet 8-3
16. Know whether or not your pig needs roughage. 8-3
17. Know the difference between external and internal parasites. 9-10:9-13
18. Know what information is communicated through ear notching. 10-1:10-2
19. Know the shape of a pig pen and the justification for that shape. 11-1
20. Know why proper manure management is important. 11-6
21. Know how to prepare to show your pig. 12-1
22. Know the appropriate uses for a pig whip/cane. 12-5
23. Know the causes and prevention of animal related accidents. 14-1: 14:2
24. Know what a zoonotic disease is and the common zoonotic diseases. 14-2
25. Know the average length of gestation in swine. 20-2
26. Know what withdrawal time is. 24-2:24-3
27. Know the three types of injections for swine. 24:7
